## National Safe Boating Week 2011

### Bringing It Home - Safely

National Safe Boating Week runs from Saturday to May 25 this year. US Coast Guard Forces nation-wide and especially here "Out East" have a lot of plans to make safety a daily, year-long event. This column is about that.

### National Safe Boating Week

By 1958, boating "by the millions" rather than "by millionaires" was in full swing. What Coast Guard statistics showed was that the democratization of boating was coming at a cost - and it wasn't the 29 cents per gallon for the gasoline. It was accidents and fatalities.

The US Congress passed the Federal Boating Act and the National Safe Boating Week was born upon President Eisenhower's signature.

It was initially run as a committee - US Coast Guard as chairman, with the US Coast Guard Auxiliary, the Power Squadron and the Red Cross as its informal members. It still took some

time for the focused attention on boater safety to work its way through long habits and aged traditions. It wasn't until 1973, when 1,754 people died in boating accidents, that the trend started to reverse. Why? Why else - money, people and untiring focus!

### **Safety First - The Big Picture**

Safety isn't something you put on like an overcoat. Safety, to be truly effective, needs to be part of your daily habit and part of that is education - day-in, day-out. US Coast Guard Auxiliary Division-18 is all about education. Division 18 is comprised of four flotillas and it is at the flotilla level where the work gets done. Division 18 supports three Coast Guard stations "Out East" - SFO Moriches, Station Shinnecock, and Station Montauk.

### **Boat Smart. Boat Safe. Wear It**

In 2012, the "Wear It!" campaign will continue, reminding boaters from coast to coast to put on their life jackets when on the water. The campaign is sponsored by the Coast Guard Auxiliary, the National Safe Boating Council and many other boating organizations. Looking ahead to the 2012 campaign, note that the National Safe Boating Council will offer its free material on its [www.safeboatingcampaign.com](http://www.safeboatingcampaign.com) website. There is nothing stopping marina owners, dive shop proprietors, camp counselors and concerned parents from getting and using those materials.

On Saturday at noon the US Coast Guard Auxiliary, in cooperation with West Marine Patchogue, will be holding a "Ready, Set, Wear It!" event.

The West Marine store will be opening at 8 AM and the Coast Guard Auxiliarists will be promoting life jacket wear and performing free vessel safety checks for all boats that are trailered in.

At 12 PM will be the photo op for the Ready Set Wear It event and it's our hope to get as many members as possible there wearing their life jackets for the photo op. "Hey, honey, there's me!"

The simple use of life jackets when engaging in any boating or paddle boat activity saves lives. Obeying and knowing the navigation rules or the nautical "Rules of the Road" through safe boating classes and not drinking alcohol or taking drugs while operating a boat, will save the lives of the boaters and those sharing the water with you.

Wearing a life jacket can reduce the number of boaters who lose their lives by drowning each year by approximately 80 percent. It is a simple task that has the potential to reduce terrible loss in lives. The goal of National Safe Boating Week is to emphasize the year-round effort to promote safe boating. All who enjoy the waters of our beautiful state are urged to practice safe boating habits. Remember: "Boat Smart. Boat Safe. Wear it."

### **Kayak Races And TrawlerFests**

At \$5 per gallon for fuel, we can expect the explosion in the use of paddle sports to continue and the Coast Guard's Operation Paddle Smart is key to curtailing the injuries and even deaths that these pastimes are piling up statistically.

## Life Jacket Statistics

World War II brought us the inflatable life jacket, as worn by sailors, pilots and submariners. The fabric, which looked like rubber, dried out easily. Talcum powder was used to keep the fabric pliable. Later on, military technology was applied to making consumer life jackets. These have developed through the years to the various styles we see today. But any life jacket, inflatable or otherwise, must be worn to work.

Here are the stats: 16 people go in the water with life-jackets on and 15 come out. Sixteen people go in the water without life jackets on - and one comes out.

Don't be a statistic.

BTW, if you are interested in being part of USCG Forces, email me at [JoinUSCGAux@aol.com](mailto:JoinUSCGAux@aol.com) or go direct to the DISR Human Resources department, who are in charge of new members matters, at [DSO-HR](#) and we will help you “get in this thing...”
